**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 22-29, drawn to a method for controlling an overactive bladder, classified in class 607, subclass 41.
  - II. Claims 30-39, drawn to a method/ apparatus for estimating bladder volume, classified in class 607, subclass 40.

The inventions are distinct, each from the other because of the following reasons:

Inventions I. and II. are different methods and are therefore individual and distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made by Frances P. Oropeza to Harvey B. Jacobson, Jr. on 4/21/03 to request an oral election to the restriction requirement. Mr. Jacobson replied on 4/23/03 indicating a written restriction is needed to enable the Inventors to make the election. Mr. Jacobson requested the restriction be mailed.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

The Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 3762

application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
